DREAMS OF DRESS.

Dolly Varden hats and Dolly Varden silks and muslins have come back to high favor.

Grasscloth is likely to hold its high position for the entire summer, in order to keep it from becoming common its price is quite high.

Panniers appear upon a few of the Parisian models. They are of drapery net or other dry textile, and merely suggest a panier in arrangement.

The new sheer wools, both plain and patterned, are a delight to the eye, with their delicateness of texture and to the touch with their silky softness.

The newest organdies are in exquisite dresden patterns, and the India muslins copy expensive Marie Antoinette silks and satin lavishes in their designs.

The very popular sleeve model of the moment fits the arm very closely, some inches above the elbow, and has a short, full puff at the top, close at the wrist, sharply pointed and frilled with rich lace.

Rustle peraline is a very good substitute for a silk lining. It is used by some of the best modistes in making spring gowns. It is sold in black, brown and gray shades; also in white and pearl color.

In very many of the new gowns made by Frenchmen the sleeves are very long, with the "calle" point over the hand. Dinner gowns are made with long, pointed bodices, cut on ponypour in the neck, front and back.

English Norfolk jacket suits are made of pin check wools in various novel and pretty color combinations, but the majority of the modiste stilletines and twilled molaines are made up in tailor fashion, with full good skirt and an open fronted jacket that is cut to lap and button when occasion requires.

The vacation plate is still a feature of house gowns, and most of them have a princess effect with much trimming on the front and shoulders, the sleeves either full elbow puffs, or a close coat shape, with smaller puffs at the top of the arm, made spreading in effect, however, by the long points from the collarette that fall above them.—New York Post.

OUR GIRLS.

The economical girl is making her last year's clothes over into bloomers.—Philadelphia Record.

A young lady friend who has given much thought to the subject informs us that a kiss is the mouth piece of love.—Boston Transcript.

If a woman hasn't a husband, she gets a cat or a dog—anything, so it is something she can worry about for staying out nights.—Arlington Globe.

When a girl is 16, the eligibility of a young man depends a good deal on what sort of a mustache he has. When she is 28, she is likely to think more about his bank account.—Somerville Journal.

The Maid of Boston.

"Maid of Boston, ere we part, Give me, give me, love, your heart!" "Sure!" she answered on the spot. And the marble heart he got.—Town Topics.
